

LAMINATE FLOORING

COLLECTION 2024

Quality product of  UNILIN

FEATURES

UNICLIC

With Uniclic, installation is a piece of cake. It ensures a strong and seamless transition from one plank to the next.

ANTI-STATIC

Loc Floor products receive a permanent anti-static treatment, so static electricity charges cannot accumulate anymore, even in dry climate conditions. Anti-static surfaces are easier to clean as dirt and dust will not stick to the floor.

EU ECOLABEL

UNILIN was the first to receive the European Ecolabel for laminate flooring. The EU Ecolabel is a label of environmental excellence that is awarded to products and services meeting high environmental standards throughout their lifecycle: from raw material extraction, to production, distribution and disposal.

PEFC

All of our laminate floors carry the PEFC label, which is your guarantee of responsible forestry management and conservation. For every tree that we chop down, we plant a new one.

AQUA PROTECT

Thanks to the Aqua Protect technology, your floor is completely water resistant. A perfect floor for every room in your house (including bathrooms and kitchens).

WATERTIGHT FINISH

Prevent moisture from seeping below the floor at the edges by using the Foamstrip and the SmartFinish AquaProtect kit. This ensures a watertight sealing of expansion gaps along walls, radiator pipes and profiles.

1. Foamstrip

NEFOAMSTRIP20 - 20 × 1 M × Ø 10 MM

Elastic strip to install in gaps around the floor perimeter.

2. SmartFinish AquaProtect kit

SFKITTRANSP - 310 ML

Transparent silicone to apply on top of the Foamstrip and to seal skirtings and profiles.
